

2019 CANADIAN CRITICAL CARE REVIEW PROGRAM June 6 – 7, 2019 The Old Mill, Toronto

Learning Objectives

The learning objectives are developed based on the Royal College of Physicians and Surgeons of Canada objectives of training in Adult Critical Care.

By the end of the program, participants will be able to:

- 1. Describe evidence-based approaches to assessment of adult patients with critical illness;
- 2. Develop and implement evidence-based management plans for adult patients with critical illness.

THURSDAY, JUNE 6, 2019

Sessions will be held in Brulé C.

Breakfast and lunch will be held in Brulé B.

Exhibits and breaks will be held in Brulé B.

Time	Session	Faculty
7:00 a.m 8:00 a.m.	Breakfast	
8:00 a.m 8:15 a.m.	Welcome	Program Chairs
8:15 a.m 9:00 a.m.	At the end of this session, participants will be able to: understand pathogenesis and immune response to sepsis; review the diagnostic criteria for sepsis; review treatment of septic illnesses; and understand preventative infection control	Bram Rochwerg
9:00 a.m 9:45 a.m.	techniques. Arrhythmias: Approach and Treatment	Shaheeda Ahmed
3.00 a.m 3.43 a.m.	At the end of this session, participants will be able to: • provide a diagnostic approach to arrhythmias encountered in the ICU; and • highlight principles of management.	Shaheeda Aliilled

9:45 a.m 10:30 a.m.	Weaning from Mechanical Ventilation	Karen Bosma
	 At the end of this session, participants will be able to: describe the 3 epidemiologic weaning groups and their respective prognoses; apply evidence-based methods for screening and testing patients to identify those ready for extubation; and formulate a management plan for difficult to wean patients. 	
10:30 a.m11:00 a.m.	Break	
11:00 a.m 11:45 a.m.	Infectious Diseases in the ICU: Bugs & Drugs	Wendy Sligl
	At the end of this session, participants will be able to: • identify common ICU infections and optimize management; • recognize Infections not to be missed • describe mechanisms of antimicrobial resistance and example pathogens; and • list types of immune compromise and opportunistic infections seen in critical care.	
11:45 a.m 12:30 p.m.	Toxicology and Drug Overdoses	Maude St-Onge
	At the end of this session, participants will be able to: describe the main elements of risk evaluation; differentiate different toxidromes manage appropriately the unstable poisoned patient; describe the indications and modalities for extracorporeal toxin removal describe the indications for extracorporeal life support.	
12:30 p.m 1:30 p.m.	Lunch	
1:30 p.m 2:15 p.m.	ICU Hematology	Ryan Zarychanski
	 At the end of this session, participants will be able to: identify the optimal use of red cell and plasma transfusion and anticoagulant reversal; demonstrate an approach to thrombocytopenia in the ICU including HIT / DIC diagnosis and treatment; 	

		1
	identify the role for therapeutic apheresis in	
	critical illness; and	
	demonstrate an approach to Thrombosis in the	
	ICU.	
2:15 p.m 3:00 p.m.	ICU Management of Trauma Patients	Mark Oppenheimer
	At the end of this session, participants will be able	
	to:	
	understand advanced topics in the	
	resuscitation of trauma patients in hemorrhagic shock;	
	describe an approach to the management of severe TBI and ICP elevation; and	
	list the indications for diagnostic imaging tests	
	in the work up of the injured trauma patient.	
3:00 p.m 3:30 p.m.	Break	
3:30 p.m 4:15 p.m.	The Recovery Journey	Elizabeth Wilcox
	At the end of this session, participants will be able	
	to:	
	describe the contributors to ICU Acquired	
	weakness, including its pathophysiology and	
	prognosis; and	
	identify the major physical and	
	neuropsychological morbidities of an episode	
	of critical illness for patients and families.	
4:15 p.m 5:00 p.m.	Gastroenterology in ICU: Liver Failure, GI Bleeding, Pancreatitis, Abdominal Compartment Syndrome	Mark Oppenheimer
	At the end of the session, the participant will be able to:	
	understand the management and	
	prognostication of acute liver failure;	
	 diagnose and develop treatment plans for 	
	acute gastrointestinal hemorrhage;	
	 recognize the supportive treatments and 	
	interventions for acute pancreatitis and its	
	complications; and	
	 list the physiologic impact and indications for 	
	surgery in abdominal compartment syndrome.	
	i and a substitute of the subs	1

FRIDAY, JUNE 7, 2019

Sessions will be held in Brulé C. Breakfast and lunch will be held in Brulé B. Exhibits and breaks will be held in Brulé B.

Time	Session	Faculty
7:00 a.m 8:00 a.m.	Breakfast	
8:10 a.m 8:15 a.m.	Welcome	Program Chairs
8:15 a.m 9:00 a.m.	The Cardiovascular ICU Patient: Complications and Mechanical Devices At the end of this session, participants will be able to: describe the common postoperative cardiac surgery complications and an approach to their management; and describe the modalities, indications, contraindications, and complications of commonly applied mechanical circulatory support modalities.	Ken Parhar
9:00 a.m 9:45 a.m.	 At the end of this session, participants will be able to: describe the evidence for and against the use of steroids in Septic Shock; describe the current recommendations for glycemic control in critical illness; list the potential endocrine complications of brain injury and a plan for investigation and management; and describe an approach to uncommon endocrine emergencies. 	Wael Haddara
9:45 a.m 10:15 a.m.	Break	
10:15 a.m 11:00 a.m.	 Management of the Organ Donor At the end of this session, participants will be able to: describe the pathways for potential organ donation in a typical Canadian organ donation organization; describe the criteria for the determination of death by neurological and circulatory criteria; identify potential pitfalls in the determination of death; 	Jeff Singh

	describe typical evidence-informed	
	management of potential organ donors; and	
	list three presently evolving concepts in the	
	evolution of donation science in Canada.	
11:00 a.m 11:45 a.m.	Acute Respiratory Failure I: ARDS	Ken Parhar
	At the end of this session, participants will be able	
	to:	
	review the diagnostic criteria for patients with	
	ARDS; and	
	a coordination appears approach to	
11 15 12 15	managing the patient with ARDS.	
11:45 a.m 12:45 p.m.	Lunch	
12:45 p.m 1:30 p.m.	Neurological Critical Care	Laurel Murphy
	At the end of this session, participants will be able	
	to:	
	review key neuroanatomy and principles of	
	neurophysiology relevant to the critical care	
	patient;	
	overview of the management of TBI; and	
	review of high yield literature and topics	
	including declaration of neurological death.

Completion of Needs Assessment / Program Evaluation Nutrition in the ICU At the end of this session, participants will be able	

	 indications for specific nutritional therapies (enteral vs. parenteral); and role/utility of metabolic assessments in the ICU – monitoring response to therapy. 	
3:15 p.m 4:00 p.m.	Acute Kidney Injury & Renal Replacement Therapies	Jan Friedrich
	At the end of the session, the participant will be able to: • describe treatments for acute renal failure in ICU including the differences between the various renal replacement modalities; and • assess the evidence underlying treatments of acute renal failure in critically ill patients.	
4:00 p.m 4:15 p.m.	Closing Remarks	Program Chairs

This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada, and approved by Continuing Professional Development, Schulich School of Medicine & Dentistry, Western University. You may claim a maximum of 9.0 hours (credits are automatically calculated).

This activity is an Accredited Self-Assessment Program (Section 3) as defined by the Maintenance of Certification Program of The Royal College of Physicians and Surgeons of Canada, and approved by Continuing Professional Development, Schulich School of Medicine & Dentistry, Western University. You may claim a maximum of 4.0 hours (credits are automatically calculated).

Each participant should claim only those hours of credit that he/she actually spent participating in the educational program.
